The Global Language of Business

GS1 Foundations for Healthcare Online Certificate Course
Get Product Data Right the First Time

Are you new to GS1 Standards or need a refresher? The GS1 Foundations for Healthcare Online Certificate Course covers the foundational aspects of globally unique product and location identification and barcoding with GS1 Standards—specifically as they relate to:

- How to use your company's GS1 Company Prefix to create GS1 identifiers for healthcare products and locations
- Global Trade Item Number® (GTIN®) and barcode usage for healthcare
- Track and trace processes

The only way businesses big or small can conduct their operations efficiently is by working together and understanding each other. GS1 Standards are the global language of business—a language for identifying, capturing, and sharing information accurately, from source or manufacturer to consumer.

The GS1 Foundations for Healthcare Online Certificate Course Is Designed To:

- Teach you the basics of the GS1 System of Standards, including how to request that your National Drug Code (NDC) Labeler Code be included as part of your GS1 US-issued GS1 Company Prefix
- Provide you with a standards-based perspective on the foundation of product data quality
- Help you understand how you can leverage GS1 Standards for streamlined business processes

Who Would Benefit:

Healthcare professionals who manage the product life cycle from creation through distribution and merchandising, including product management, supply chain operations, logistics, category management, and shopper marketing.

Earn a Badge

Did you know when you successfully complete a GS1 US® certificate course, you can earn an important credential in the use of GS1 Standards? And you can add this new skill to your online profile with a GS1 US Badge and share it via social media.

Take this certificate course to gain valuable knowledge about how to use GS1 Standards for product and location identification, product labeling, and data sharing. Bring back your new knowledge to your organization and enhance your own professional development.

About GS1 US

GS1 US, a member of GS1® global, is a not-for-profit information standards organization that facilitates industry collaboration to help improve supply chain visibility and efficiency through the use of GS1 Standards, the most widely used supply chain standards system in the world. Nearly 300,000 businesses in 25 industries rely on GS1 US for trading partner collaboration that optimizes their supply chains, drives cost performance and revenue growth, while also enabling regulatory compliance. They achieve these benefits through solutions based on GS1 global unique numbering and identification systems, barcodes, Electronic Product Code-based RFID, data synchronization, and electronic information exchange. GS1 US also manages the United Nations Standard Products and Services Code® (UNSPSC®). For more information, visit www.gs1us.org.
