CHALLENGE
Herbal Destination and Voodoo Ride, both small growing businesses, were working to expand their distribution channels to include large, national retailers. Each was using barcodes purchased from online barcode sellers; yet, they soon discovered they needed to use the GS1 Company Prefix and other GS1 Standards to conduct business with these mass retailers.

SOLUTION
The companies contacted GS1 US™, the organization authorized in the U.S. to license the GS1 Company Prefix. Now, each business creates Universal Product Codes (U.P.C.s) for its products that protect its company’s brand identity as they travel through the supply chain. By using additional GS1 Standards to identify cases and locations as well as share and synchronize data, the companies can start to realize operational benefits and growth.

BENEFITS
Herbal Destination and Voodoo Ride benefit in multiple ways from using the GS1 Company Prefix.

• Both companies are now positioned to expand their distribution by trading with large retailers – in the U.S. and abroad.

• Herbal Destination can track and trace its products to retailers’ shelves, in compliance with regulatory requirements.

• Voodoo Ride synchronizes data with its large, national retailers for data accuracy and operational efficiency.

• Both companies can get new products to market faster than before.

• Both companies have laid GS1 Standards foundations to enable electronic commerce with their trading partners.
EXPANDING THEIR FOOTPRINTS

Founded in 2009, Herbal Destination makes herbal supplements, skin care, and pain relief products for consumers in the U.S. and Canada. Herbal Destination products are based on ancient Ayurveda formulas. Ayurveda roughly translates to “knowledge of life” and is one of the oldest systems of organized medicine in the world.

Shaker Nelanuthala, Director of Sales, explains, “Our herbal-based products are natural and created from ancient recipes, some of them going back to the 16th century. We manufacture them in our state-of-the-art facilities in India, bringing tradition and technology together for the benefit of our customers.”

Herbal Destination products are sold by many small, medium and large retailers. The products are also sold through the company’s own e-commerce website as well as through many e-tailers. Yet, Herbal Destination didn’t always use a GS1 Company Prefix.

Nelanuthala explains, “We approached two very large retailers. We had purchased barcodes from an online seller. They basically said ‘don’t bother applying if you are not a member of GS1 US.’ So I joined GS1 US and obtained a GS1 Company Prefix [to create barcodes for our products]. For us, it’s now a business requirement for working with these large retailers.”

Christopher Ferraro, CEO and President of Voodoo Ride, also discovered the value of using a GS1 Company Prefix. Ferraro started Voodoo Ride in 2008 at the height of the financial crisis. “I didn’t hesitate a minute to launch our business. We have great products and a great partner, Dale Earnhardt, Jr., the ‘ultimate car guy,’” says Ferraro. Ferraro’s sense of timing was right. Even with the economy’s challenges, Voodoo Ride is now doing business with national retailers.

Voodo Ride offers a portfolio of car care products that makes serious car care not quite so serious. The products are “wickedly” simple, high-quality and long-lasting. To reach the many car owners in the U.S., Ferraro launched a national program with the 4,500 stores of a large retailer of automotive replacement parts and accessories. “We are doing the same this year by taking our car care products and licensed apparel to another major national retailer,” says Ferraro. “After using some barcodes that I bought online from another company, I was surprised when I learned I needed to get authorized GS1 barcodes before these retailers would accept our products.”

TRANSITIONING TO GS1 STANDARDS

GS1 US, the GS1 member organization in the U.S., quickly helped Herbal Destination and Voodoo Ride each license a GS1 Company Prefix to create barcodes for their products. Now, each company can trade with large retailers.

Ferraro also creates and uses another GS1 Standard – the Serial Shipping Container Code or SSCC – to identify Voodoo Ride’s shipping cartons and contents. “Changing to GS1 Standards was an investment in our future,” says Ferraro. “We changed everything over for the automotive retailer like...
CASE STUDY: HERBAL DESTINATION AND VOODOO RIDE—JULY 2012

Creating new GS1 barcode labels for our products and cartons. This put us in a great position for doing business with other large retailers. We also have trading partners in Japan and Australia, so it’s good to know the switch to GS1 will support Voodoo Ride in those global markets.”

Ferraro uses a GS1 Standard – the GS1 Global Data Synchronization Network™ (GDSN) – to share and manage Voodoo Ride’s product data with his large retailers. “We’re using ISYNC® as our GDSN Data Pool. I have published all the data they need, including the GLNs [Global Location Numbers], to make our business transactions accurate. If I make changes to my product data [like pricing and dimensions], I now know these changes will be automatically sent to the retailers’ systems. This is a major step for us that will deliver major efficiencies as we fulfill more and more orders from national retailers.”

While both Herbal Destination and Voodoo Ride expended time and cost to re-label products with new GS1 Company Prefix barcodes, they consider the change to GS1 Standards as an investment in their businesses. By investing in GS1 Standards today, they can avoid potential costs down the road and improve their inventory management.

“We wanted to grow,” says Nelanuthala. “I would advise anyone considering a GS1 Company Prefix to make the investment. The cost of becoming a GS1 US member will pay off in the long run.”

Ferraro advises, “GS1 Standards are important for a business that wants to grow. They open a door to a level of sophistication that companies will need in order to do business with retailers that are ultimately going to make their businesses successful.”

Partner Connections Benefits

When Herbal Destination and Voodoo Ride licensed their GS1 Company Prefixes, they became members of GS1 US Partner Connections.

Through the GS1 US Member Support Team, members receive guidance on all types of topics related to using GS1 Standards for barcodes and e-commerce. This knowledgeable team welcomes all questions about using the GS1 Company Prefix and other GS1 Standards.

Members gain access to experts at GS1 US headquarters and GS1 overseas offices, which work with standards, industry communities and members every day.

Members get a free online tool – Data Driver® – that helps them simplify creating, managing and printing barcodes for all packaging levels.

Members gain online access to useful, educational materials – self-paced learning, whitepapers, “how to” guides – as well as educational sessions like “Ask the Expert” where they can ask how to best apply GS1 Standards.

Members are kept informed and up-to-date about how any changes in their industries might impact their use of GS1 Standards.

INVESTING IN GROWTH

In some industries such as healthcare and herbal supplements, there are regulatory requirements for traceability for potential product recalls.

“GS1 US helped us by recommending an appropriate GS1 Company Prefix, which is typically used by healthcare and herbal products manufacturers,” says Nelanuthala. “With a GS1 Company Prefix as part of our product barcodes and by putting other GS1 Standards in place, we can trace our products to retailers’ shelves. If we ever need to recall a product, we can pinpoint the specific batches/ lots for our retailers to pull. This will save us and our retailers significant time and potential revenue.”

“With the GS1 system in place, it will help me get my products to market much quicker than before.”
—SHAKER NELANUTHALA, Director of Sales, Herbal Destination

ABOUT HERBAL DESTINATION
Started in 2009, Herbal Destination manufactures a unique line of herbal natural supplements, skincare, and pain relief products which are distributed nationally. All products are “Condition Specific” and include: cholesterol support, blood sugar support, stress relief, sleep, memory support and men’s libido. The skincare products are designed using fruits, nuts and herbs, for under eye care, wrinkle help. The oil is designed for muscle and joint pains. Herbal Destination is a 100% women and minority-owned business. www.herbaldestination.com

ABOUT VOODOO RIDE
In business since 2008, Voodoo Ride takes car care to an entirely new level of quality, providing customers with premium, simplified car care products. The company formulates its products with the finest, cosmetic-grade ingredients using the latest technology. Customers achieve superior results in less time, with less effort while spending less money. The products are engineered for multi-surface application and functionality, like Mojo All Surface Detailer. Mojo can be used bumper to bumper for a high-gloss, professionally detailed look in seconds. Voodoo Ride is “car care unleashed.” www.voodooride.com

ABOUT GS1 US
GS1 US, a member of GS1, is an information standards organization that brings industry communities together to solve supply-chain problems through the adoption and implementation of GS1 Standards. More than 200,000 businesses in 25 industries rely on GS1 US for trading-partner collaboration and for maximizing the cost effectiveness, speed, visibility, security and sustainability of their business processes. They achieve these benefits through solutions based on GS1 global unique numbering and identification systems, barcodes, Electronic Product Code-based RFID, data synchronization, and electronic information exchange. GS1 US also manages the United Nations Standard Products and Services Code® (UNSPSC®). www.gs1us.org
