**Notes:**
- Apparel with dual sizing, such as waist and inseam, uses the dominant or primary size designation for color cross-reference. For example, in men's pants, the waist sizes are cross-referenced to a color. The objective of using the dominant size is to limit the colors used in the chart to a reasonable number based on consumer focus group feedback. Suppliers from these specialized industries were polled to determine the dominant size indicator.
- Specific color formulas (PMS) from the Pantone® Color Formula Guide are assigned for each value shown on the chart. Please use the Pantone® Color Formula Guide for exact color matching.
- This document approximates the target PMS colors. Color representation may vary, depending upon your computer screen or output device.

How to use this Chart:
1. Top color bar: Generic sizing (small, medium, large)
2. Center color bar: Measured or Sized garments by family of business
3. Bottom color bar: Footwear

---

### How to use this Chart

1. **Top color bar:**
