

GS1 US Data Hub 5.1 | RELEASE NOTES

Data Hub Release 5.1 supports GS1 US subscribers by helping them to identify, create, manage, use, and verify product and location data through one convenient, data-sharable platform. The main enhancements in this release center around support for the import and management of Global Prefixes and improved location support for healthcare. Additionally, the release includes user requested changes and needed corrective actions.

ENHANCEMENTS

Data Hub|Product

- Updates in this release will enable Global Prefix Support that allows users to:
 - Manage prefixes in Data Hub, which are subscribed from another GS1 MO,
 - View global prefix capacity in their dashboard in Data Hub,
 - Create, Update, and Modify their global prefix products (including EAN products), and
 - Send global prefix product information to the GRP through Data Hub.
- Brand Owners with EAN-range GS1 Company Prefixes licensed through GS1 US will be able to create and manage their GTIN-13 product records in Data Hub.
- Validation of the ImageURL attribute has been added
 - Ensures that the filetype of the Image URL is valid and can be shared up to the GRP
 - Validation status will be indicated in Data Hub
 - Note that the entire URL (including https://) is required
