

GS1 US Data Hub 2023 December

RELEASE NOTES

GS1 US Data Hub allows you to identify, create, manage, use, share, and verify product and location data through one convenient platform. The Data Hub 2023 December release delivers several important enhancements across the Product and Location modules.

Enhancements

GS1 US Data Hub | Product

Create/Manage

- GTIN Opt-Out
 - Addition of table displaying products that have been Opted Out of Sharing.
 - Ability to re-share products via a new "Opt-In" Action in the same Import function used for opt-outs.

View/Use

- Reimplemented "Verified by GS1" icon to indicate a product that can be found in the GRP and is associated with an active license.

Enterprise Edition

- Entity GLN is no longer a required field for Global License Import

GS1 US Data Hub | Location

DSCSA Enablement

- SGLN added to export functionality in Create/Manage and View/Use

View/Use

- Address added to View/Use table displays
- Performance enhancements

Create/Manage

- Address added to Create/Manage table displays
- Additional attributes available in the Admin Parent Modal when creating a new GLN
- Pre-validation available for Import
 - Enables users to check an import file against DH|L validations prior to attempting a full import with GLN enumeration
