

GS1 US Data Hub 3.3 | RELEASE NOTES

EFFECTIVE: March 12, 2018

Data Hub 3.3 continues supporting GS1 US subscribers to identify, create, manage, use, and verify data through one convenient, data-sharable platform. This release covers user requested and program changes since the last update November 2017 and introduces functionality to support the previously announced Certified Content Provider (CCP) program.

REQUIREMENTS

- **NEW** Location *Import* address pre-processing: allows GPO to submit a verify address request through import to ensure addresses are correctly formed, valid and not duplicated
- **NEW** Location *View/Use* Location Not Shared searches now include a Location Name filter
- **NEW** Administration: Solution provider selection/notification process supporting the CCP program will enable company administrators to identify the CCP(s) they are working with
- **NEW** Product *Manage*: Product selection/assignment/approval process supporting the CCP program will enable users to allow CCPs to add content using an API interface to the users' InUse product records.
- **NEW** Enhanced product attribute fields added to Product *Additional Information* screen as a new section that is expandable/collapsible area at the bottom of the Product Additional Information. Fields are for brand owner use and viewable by product view/use subscribers
- **NEW** Product *Additional Information* screen includes a visual indicator after product content and/or image is added and approved by the brand owner
- **NEW** Developer API for CCPs: Attribute fields in the API are provided specifically for solution partners who are certified under the new CCP program. Requires CCP subscription

ADDITIONS

- Home Screen: Account No. descriptor label added in front of the account number
- Home Screen: Confirmation pop up when user clicks "Add New Prefix" to add clarity to the action
- Product Additional Information: Help bubbles are added to the Enhanced product information field, supporting the CCP program
- **NEW** Visual Aids supporting the Certified Content Provider program:
 - [Brand Owner's Guide to Managing Enhanced Content](#)
 - [Solution Provider's Guide to Managing Enhanced Content via API](#)

CORRECTIONS

- Number of records to display per page allows for user to select 10, 25, 50, 100, 200, 500
- Product Display Shipper edit corrected to allow one item in the container.

CHANGES

- Location *Approval Email Notifications*: Enhanced messages provide more useful information
- Product *Additional Information Dimensions*: Added “(UOM)” to Units of Measure attribute name
- Product Barcode image warning statement amended to add clarity

REMOVALS

- Help Center user experience: A single click on “Help” will bring user directly to the GS1 US Data Hub Help Center, eliminating the need to click on Help Center
- REMINDER: Results files are deleted from data tables after 90 days on Import and after 30 days on Export
