In the best effort, all terms mentioned in this document that are known to be trademarks or registered trademarks have been appropriately recognized in the first occurrence of the term.

## 1.4 Acknowledgments

This document has been prepared by RosettaNet (<http://www.rosettanet.org/>) from requirements gathered during the Milestone Program and in conformance with the methodology.

## 1.5 Related Documents

- Associated PIP Message Schemas (included with PIP Specification only)
- Description of Partner Interface Process for 2C8
- Message Structure

## 1.6 Document Version History

<u>Version</u>	<u>Date</u>	<u>Description</u>
Released 11.00.00	16 May 2012	Updated Version

## 1.7 Document Purpose

The purpose of the document is to explain the structure, the association between objects, the content of objects and the definition for single elements to a non-technical audience.

## 2. Interchange Model

### 2.1 BillOfMaterialNotification

#### 2.1.1 Interchange Diagram

**Figure 2-1 Interchange**

#### 2.1.2 AlternateItem

The collection of business properties that describe a functional identical or comparable part that may be used in place of a primary or main part.

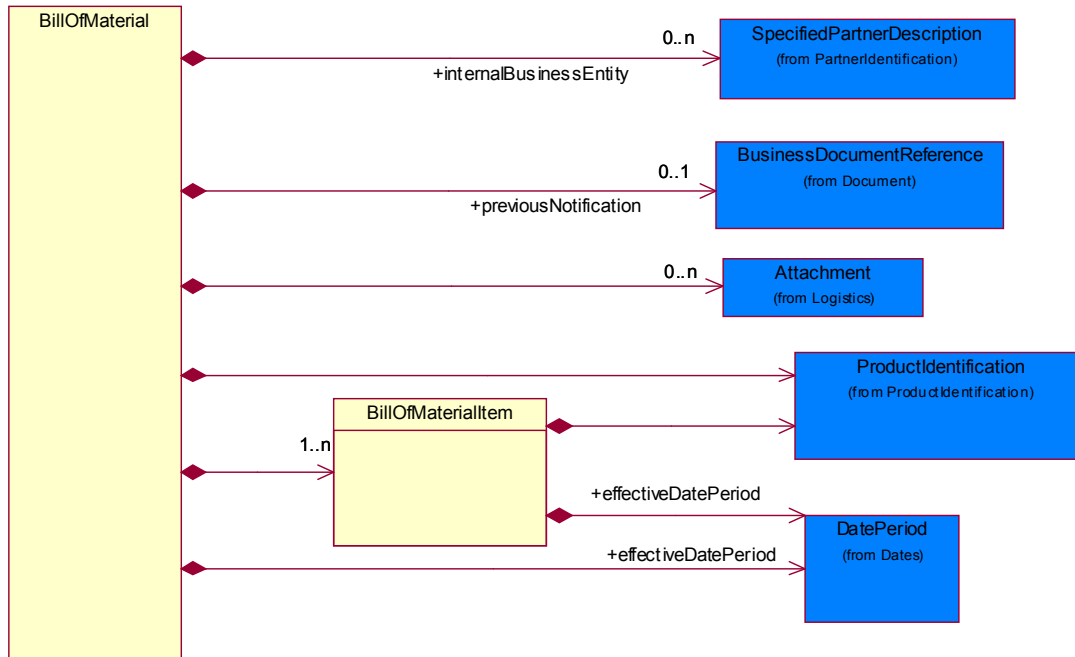

**Figure 2-2 AlternateItem**

Composition	Cardinality	Type	Documentation
PreferredStatus	1	PreferredStatus	Code identifying the status of an approved product.
ProductIdentification	1	ProductIdentification	The object provides the identifier(s) of a product.

### 2.1.3 BillOfMaterial

The collection of business properties that describes a bill of material for a product.

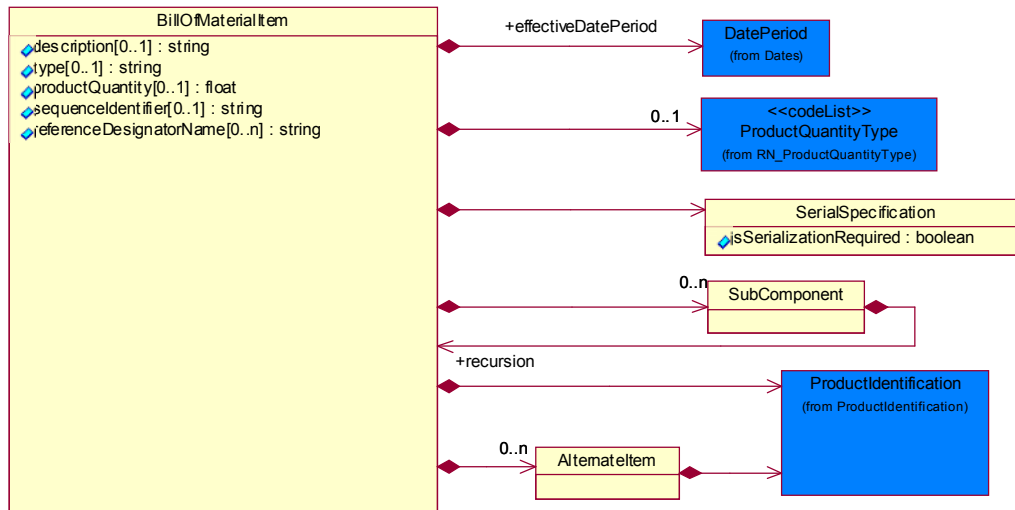

**Figure 2-3 BillOfMaterial**

Composition	Cardinality	Type	Documentation
BillOfMaterialItem	1..n	BillOfMaterialItem	The collection of business properties that describe an assembly, kit or single item. It may also be used to describe "phantom" parts.
effectiveDatePeriod	1	DatePeriod	The date range indicating when information or an activity are valid.
internalBusinessEntity	0..n	SpecifiedPartnerDescription	Identifies proprietary divisions, planning units, organizations, warehouses, or any other grouping that would cause different contacts or different planning and procurement information. Used to distinguish between multiple divisions.
previousNotification	0..1	BusinessDocumentReference	Identifies the previous notification message if this is an update to it.
ProductIdentification	1	ProductIdentification	The object provides the identifier(s) of a product.
Attachment	0..n	Attachment	A business property that describes additional information regarding a product or process.

## 2.1.4 BillOfMaterialItem

The collection of business properties that describe an assembly, kit or single item. It may also be used to describe "phantom" parts.

**Figure 2-4 BillOfMaterialItem**

Attribute	Type	Documentation
description[0..1]	string	A description of a process, thing, action, etc.
type[0..1]	string	Code identifying the type of product or item on the Bill Of Material.
productQuantity[0..1]	float	A quantity specifying the number of product units.
sequenceIdentifier[0..1]	string	An identifier which identifies the order of a designated element within a specified set.
referenceDesignatorName[0..n]	string	Identifies a single instance of a component. Normally referenceDesignator is alphabetic, graphically on the schematic and is used in the electrical interconnect description.

Composition	Cardinality	Type	Documentation
AlternateItem	0..n	AlternateItem	The collection of business properties that describe a functional identical or comparable part that may be used in place of a primary or main part.
effectiveDatePeriod	1	DatePeriod	The date range indicating when information or an activity are valid.
ProductQuantityType	0..1	ProductQuantityType	Code identifying the type of the quantity needed for assemblies or setting up.
ProductIdentification	1	ProductIdentification	The object provides the identifier(s) of a product.

SerialSpecification	1	SerialSpecification	The collection of business properties that describe serial number data used to uniquely identify a finished product.
SubComponent	0..n	SubComponent	The collection of business properties that describe a part of a component.

### 2.1.5 BillOfMaterialNotification

Contains Bill Of Material data for a given product. The Bill Of Material specifies each component part, listing quantities, serial number requirements and potential alternate parts.

Composition	Cardinality	Type	Documentation
DocumentHeader	1	DocumentHeader	The object allows for the identification of the sender and receiver of the business document.
BillOfMaterial	1	BillOfMaterial	The collection of business properties that describes a bill of material for a product.

### 2.1.6 SerialNumberRange

The collection of business properties that describe a collection of sequential serial numbers.

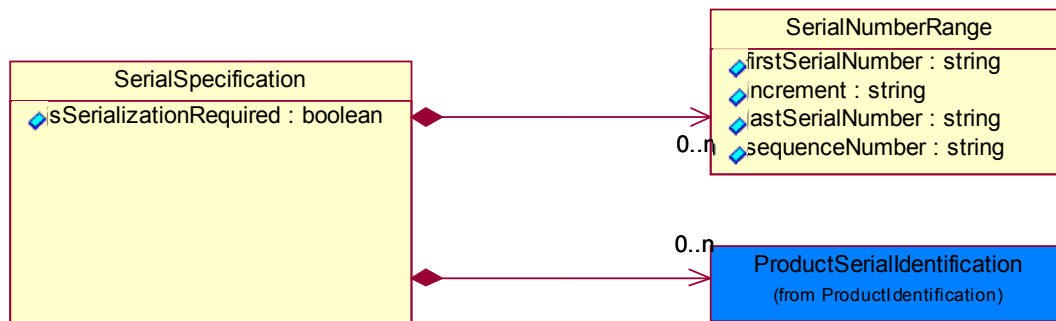

**Figure 2-5 SerialNumberRange**

Attribute	Type	Documentation
firstSerialNumber	string	The first or beginning serial number in a range of serial numbers.
increment	string	A factor which when applied to a serial number in a given range will yield the next serial number in that range.
lastSerialNumber	string	The last or ending serial number in a range of serial numbers.
sequenceNumber	string	A positive integer which identifies the order of a designated element within a specified set.

### 2.1.7 SerialSpecification

The collection of business properties that describe serial number data used to uniquely identify a finished product.

**Figure 2-6 SerialSpecification**

Attribute	Type	Documentation
isSerializationRequired	boolean	Indicates whether serial numbers must be enumerated.

Composition	Cardinality	Type	Documentation
ProductSerialIdentification	0..n	ProductSerialIdentification	The object provides the serial identifier of a product.
SerialNumberRange	0..n	SerialNumberRange	The collection of business properties that describe a collection of sequential serial numbers.

### 2.1.8 SubComponent

The collection of business properties that describe a part of a component.

**Figure 2-7 SubComponent**

Composition	Cardinality	Type	Documentation
recursion	1	BillOfMaterialItem	The collection of business properties that describe an assembly, kit or single item. It may also be used to describe "phantom" parts.

## 3. Domain ModelLogistics

### 3.1.1 Logistics

#### 3.1.1.1 Dependency Diagram

Figure 3-1 Dependency

#### 3.1.1.2 Attachment

A business property that describes additional information regarding a product or process.

Figure 3-2 Attachment

Attribute	Type	Documentation
description[0..1]	string	A description of the attachment.
descriptionCode[0..1]	string	Code identifying the type of product attachment, e.g. assembly instructions, block diagrams, test requirements, etc.
universalResourceIdentifier	string	A network-centric identifier that provides the identity of a resource.

Composition	Cardinality	Type	Documentation
MimeTypeQualifier	0..1	MimeTypeQualifier	The MIME type as defined by IANA. Please refer to <a href="http://www.iana.org/assignments/media-types/">http://www.iana.org/assignments/media-types/</a> for a list of types.

### 3.1.2 CodeList

#### 3.1.2.1 PreferredStatus

Code identifying the status of an approved product.

Name	Documentation
ALT	Alternate. Alternate approved manufacturer or supplier.
DIS	Disqualified. This particular manufacturer or supplier has been disqualified from supplying this part at the approved revision level.
EOL	End of Life. A particular part that is going to be used in production only until current inventories are exhausted.
NAV	Not Available. This part is not available to the trading partners.
OTH	Other. Need agreement before the transaction may continue.
PAP	Pilot Approved. New Product Introduction (NPI) approved. This is used in a pilot or development of a product or product line and is not meant to be production approved.
PRI	Primary. Primary or preferred approved manufacturer or supplier.
SPL	Split. A particular part that is provided by different suppliers to reduce risk or get a price discount, etc.
UQU	Under Qualification. A particular part that is undergoing qualification testing for use in production.

#### 3.1.2.2 ProductQuantityType

Code identifying the type of the quantity needed for assemblies or setting up.

Name	Documentation
ANE	As needed. Quantity is required when specifying bulk items such as adhesive or heat sink paste.
PAS	Per assembly. Quantity is required for an each occurrence, which is usually the case for most components such as resistors, SOC, VLSI, capacitors, etc.
PSE	Per setup. Quantity is required for such as a setup quantity of indirect materials used in a production run and cannot be known with certainty over how many assemblies this applies since it depends upon the quantity of the production run.
SHR	Shrinkage. Quantity is required to correct production quantities being ordered.
UPA	Use per a set quantity of assemblies. Quantity is required to assemble a specific part that consists of several items and that uses several smaller identical assemblies. This is also used to indirect materials spread over on pallet or packed in box.

## 4. Universal Structure

### 4.1 ContactInformation

#### 4.1.1 ContactInformation

The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.

**Figure 4-1 ContactInformation**

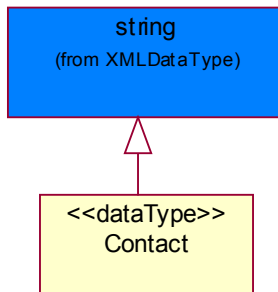

Attribute	Type	Documentation
email[0..1]	string	The electronic mail for the specified contact.
fax[0..1]	string	The fax number for the specified contact.
identifier[0..1]	string	Identifies the role of the contact (i.e. Service Technician, Account Manager) in the Business Process.
identifierCode[0..1]	string	IdentifierCode is a unique security authorization code to identify the contact- ie. badge ID.
phone[0..1]	string	The telephone number for the specified contact.

Composition	Cardinality	Type	Documentation
contact	1	Contact	The name of the department, service or individual to be contacted within the organization.

## 4.2 DataType

### 4.2.1 Contact

The name of the department, service or individual to be contacted within the organization.

**Figure 4-2 Contact**

### 4.2.2 DUNS

A number assigned by Dun and Bradstreet to identify a business location.

**Figure 4-3 DUNS**

Attribute	Type	Documentation
Pattern		[0-9]{9}

### 4.2.3 DUNSPlus4

A identifier to specify a specific location within a business location.

**Figure 4-4 DUNSPlus4**

Attribute	Type	Documentation
pattern		Data Universal Numbering System +4 (DUNS+4) number means the DUNS number assigned by Dun and Bradstreet, Inc. (D&B) plus an alphanumeric of length 4 suffix that may be assigned by a business concern.

### 4.2.4 GLN

Global Location Number (GLN) - A identifier to identify legal entities, trading parties and location.

**Figure 4-5 GLN**

Attribute	Type	Documentation
pattern		[0-9]{13}

### 4.2.5 GTIN

Global Trade Identification Number (GTIN).

**Figure 4-6 GTIN**

Attribute	Type	Documentation
pattern		[0-9]{14}

## 4.3 Dates

### 4.3.1 DatePeriod

The business document must allow for the computation or statement of a duration based upon a beginning and an ending date.

**Figure 4-7 DatePeriod**

Attribute	Type	Documentation
begin	date	The date indicating the beginning of the date period.
end	date	The date indicating the ending of the date period.

## 4.4 Document

### 4.4.1 BusinessDocumentReference

The business document reference object allows for the indirect referencing of a relationship to other business related documents.

**Figure 4-8 BusinessDocumentReference**

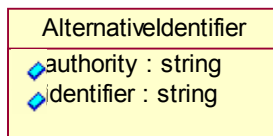

Attribute	Type	Documentation
dateTime[0..1]	dateTime	The date-time stamp indicating on the referenced business document.
identifier	string	Unique identification of the referenced business document.
line[0..1]	string	References the specific line number of the specified business document.
revision[0..1]	string	Referenced the revision of the specified business document.
subLine[0..1]	string	References the specific subline number of the specified business document.

Composition	Cardinality	Type	Documentation
DocumentType	1	DocumentType	A code identifying the business context of a document.

## 4.5 Locations

### 4.5.1 AlternativeIdentifier

Identifies the specified code and the name of the organization that a code is utilized from.

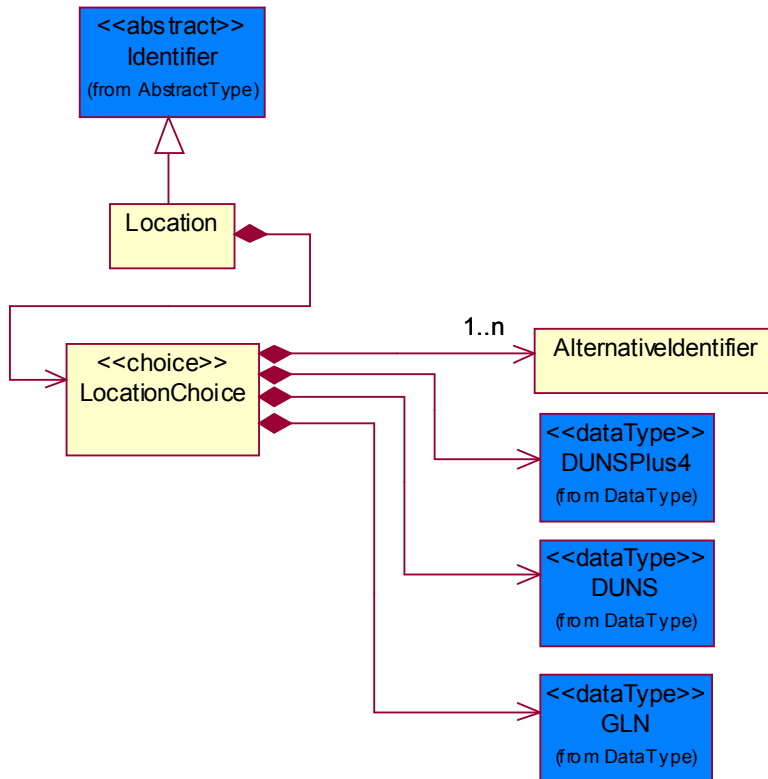

**Figure 4-9 AlternativeIdentifier**

Attribute	Type	Documentation
authority	string	The name of the organization that a code is utilized from.
identifier	string	The specified code to represent an entity (e.g. product, location, partner, etc.).

### 4.5.2 Location

The business document must specify a location.

**Figure 4-10 Location**

Composition	Cardinality	Type	Documentation
LocationChoice	1	LocationChoice	

### 4.5.3 LocationChoice

Composition	Cardinality	Type	Documentation
DUNSPus4	1	DUNSPus4	A identifier to specify a specific location within a business location.
DUNS	1	DUNS	A number assigned by Dun and Bradstreet to identify a business location.
AlternativeIdentifier	1..n	AlternativeIdentifier	Identifies the specified code and the name of the organization that a code is utilized from.
GLN	1	GLN	Global Location Number (GLN) - A identifier to identify legal entities, trading parties and location.

#### 4.5.4 PhysicalAddress

The business document must provide a physical address for a party to the business transaction.

**Figure 4-11 PhysicalAddress**

Attribute	Type	Documentation
addressLine1	string	The first line of a physical address.
addressLine2[0..1]	string	The second line of a physical address.
addressLine3[0..1]	string	The third line of a physical address.
addressLine4[0..1]	string	The fourth line of a physical address.
addressLine5[0..1]	string	The fifth line of a physical address.
cityName	string	The name of a city.
postalCode[0..1]	string	Identifying geographic location as specified by a national postal code.
postOfficeBox[0..1]	string	The Post Office Box identifier used to identify a party's post office box.

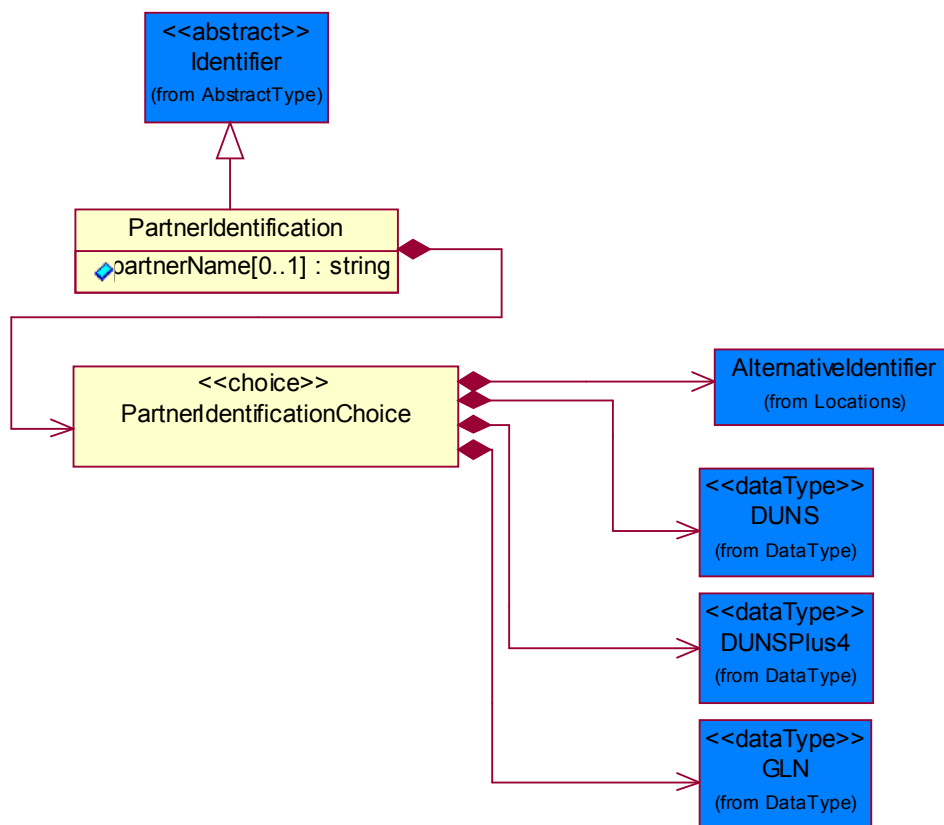

Composition	Cardinality	Type	Documentation
Country	1	Country	For representation of Country name RosettaNet has adopted ISO 3166-3; 1999. Refer to the following web page to get the latest version of the standard: <a href="http://www.iso.ch/iso/en/pr-ods-services/iso3166ma/02iso-3166-code-lists/index.html">http://www.iso.ch/iso/en/pr-ods-services/iso3166ma/02iso-3166-code-lists/index.html</a> . ## 4.6 PartnerIdentification

### 4.6.1 PartnerIdentification

The business document must allow for the identity of one or more parties to the transaction.

**Figure 4-12 PartnerIdentification**

Attribute	Type	Documentation
partnerName[0..1]	string	The name of the partner's company/business.

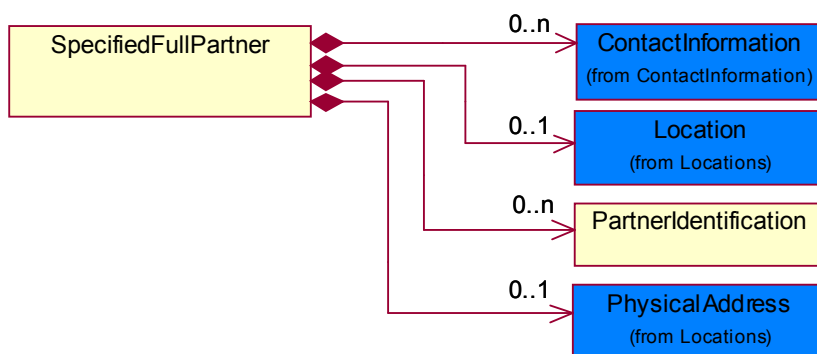

Composition	Cardinality	Type	Documentation
PartnerIdentificationChoice	1	PartnerIdentificationChoice	

### 4.6.2 PartnerIdentificationChoice

Composition	Cardinality	Type	Documentation
AlternativeIdentifier	1	AlternativeIdentifier	Identifies the specified code and the name of the organization that a code is utilized from.
DUNS	1	DUNS	A number assigned by Dun and Bradstreet to identify a business location.
DUNSPus4	1	DUNSPus4	A identifier to specify a specific location within a business location.
GLN	1	GLN	Global Location Number (GLN) - A identifier to identify legal entities, trading parties and location.

### 4.6.3 SpecifiedFullPartner

The business document must describe the trading partners in the business transaction. This data structure provide the flexibility to describe a partner in all possible methods as for new, existing or known partner. This is specifically for partner who role has been specified.

**Figure 4-13 SpecifiedFullPartner**

Composition	Cardinality	Type	Documentation
ContactInformation	0..n	ContactInformation	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.
Location	0..1	Location	The business document

			must specify a location.
PartnerIdentification	0..n	PartnerIdentification	The business document must allow for the identity of one or more parties to the transaction.
PhysicalAddress	0..1	PhysicalAddress	The business document must provide a physical address for a party to the business transaction.

#### 4.6.4 SpecifiedIntermittentPartner

The business document must describe a physical address for a delivery.

**Figure 4-14 SpecifiedIntermittentPartner**

Composition	Cardinality	Type	Documentation
ContactInformation	1	ContactInformation	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.
PhysicalAddress	1	PhysicalAddress	The business document must provide a physical address for a party to the business transaction.

#### 4.6.5 SpecifiedKnownPartner

The business document must describe the trading partners in the business transaction.

**Figure 4-15 SpecifiedKnownPartner**

Composition	Cardinality	Type	Documentation
PartnerIdentification	1	PartnerIdentification	The business document must allow for the identity of one or more parties to the transaction.

#### 4.6.6 SpecifiedKnownPartnerContact

The business document must describe the trading partners in the business transaction and allow for a identification of an individual of the trading partner.

**Figure 4-16 SpecifiedKnownPartnerContact**

Composition	Cardinality	Type	Documentation
SpecifiedKnownPartner	1	SpecifiedKnownPartner	The business document must describe the trading partners in the business transaction.
ContactInformation	0..n	ContactInformation	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.

#### 4.6.7 SpecifiedNewPartner

The business document must describe a new, existing (but known to only one of the parties to the transaction) or an unknown party to the business transaction.

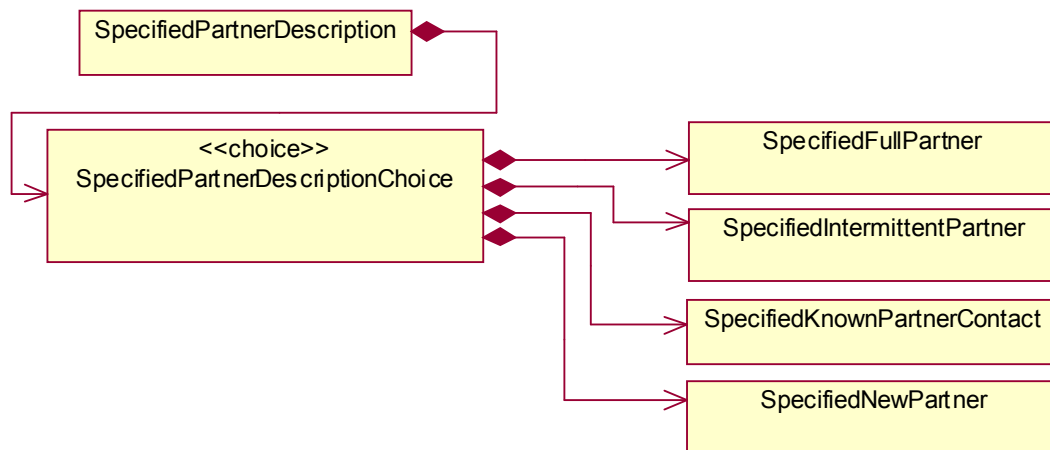

**Figure 4-17 SpecifiedNewPartner**

Composition	Cardinality	Type	Documentation
ContactInformation	1..n	ContactInformation	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.
Location	1	Location	The business document must specify a location.
PhysicalAddress	1	PhysicalAddress	The business document must provide a physical address for a party to the business transaction.
PartnerIdentification	1..n	PartnerIdentification	The business document must allow for the identity of one or more parties to the transaction.

#### 4.6.8 SpecifiedPartnerDescription

The collection of business properties that describe a business partners' identity, their contact information, where they are physically located and their function in a supply chain.

**Figure 4-18 SpecifiedPartnerDescription**

Composition	Cardinality	Type	Documentation
SpecifiedPartnerDescriptionChoice	1	SpecifiedPartnerDescriptionChoice	

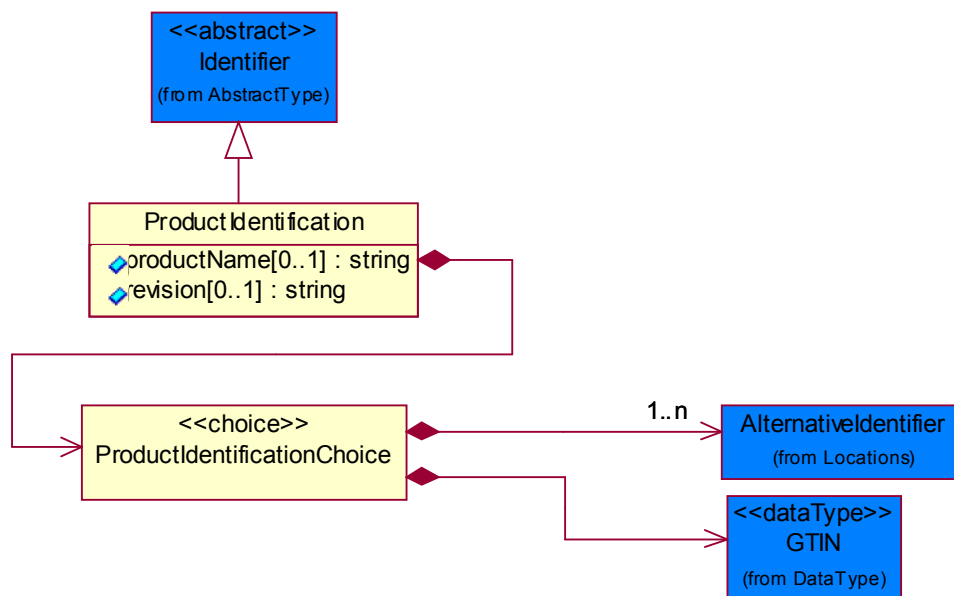

**4.6.9 SpecifiedPartnerDescriptionChoice**

<b>Composition</b>	<b>Cardinality</b>	<b>Type</b>	<b>Documentation</b>
SpecifiedKnownPartnerContact	1	SpecifiedKnownPartnerContact	The business document must describe the trading partners in the business transaction and allow for a identification of an individual of the trading partner.
SpecifiedIntermittentPartner	1	SpecifiedIntermittentPartner	The business document must describe a physical address for a delivery.
SpecifiedNewPartner	1	SpecifiedNewPartner	The business document must describe a new, existing (but known to only one of the parties to the transaction) or an unknown party to the business transaction.
SpecifiedFullPartner	1	SpecifiedFullPartner	The business document must describe the trading partners in the business transaction. This data structure provide the flexibility to describe a partner in all possible methods as for new, existing or known partner. This is specifically for partner who role has been specified.

## 4.7 ProductIdentification

### 4.7.1 ProductIdentification

The object provides the identifier(s) of a product.

**Figure 4-19 ProductIdentification**

Attribute	Type	Documentation
productName[0..1]	string	The name of the product.
revision[0..1]	string	Referenced the specified product revision.

Composition	Cardinality	Type	Documentation
ProductIdentificationChoice	1	ProductIdentificationChoice	

### 4.7.2 ProductIdentificationChoice

Composition	Cardinality	Type	Documentation
AlternativeIdentifier	1..n	AlternativeIdentifier	Identifies the specified code and the name of the organization that a code is utilized from.
GTIN	1	GTIN	Global Trade Identification Number (GTIN).

### 4.7.3 ProductSerialIdentification

The object provides the serial identifier of a product.

**Figure 4-20 ProductSerialIdentification**

Attribute	Type	Documentation
identifier	string	A unique serial identifier assigned to a product.

Composition	Cardinality	Type	Documentation
ProductIdentification	1	ProductIdentification	The object provides the identifier(s) of a product.

## 4.8 CodeList

### 4.8.1 Country

For representation of Country name RosettaNet has adopted ISO 3166-3; 1999.

Refer to the following web page to get the latest version of the standard:

<http://www.iso.ch/iso/en/prods-services/iso3166ma/02iso-3166-code-lists/index.html>

If you need more information about the ISO standard please contact ISO for more details.

### 4.8.2 CountrySubdivision

For representation of a Countries subdivisions RosettaNet has adopted ISO 3166-3; 1999. Refer to the following web page to get the latest version of the standard:

<http://www.iso.ch/iso/en/prods-services/iso3166ma/02iso-3166-code-lists/index.html>

If you need more information about the ISO standard please contact ISO for more details. **Language**

For representation of Language name RosettaNet has adopted ISO 639-2; 1998.

Refer to the following web page to get the latest version of the standard:

<http://www.loc.gov/standards/iso639-2/iso639jac.html>

If you need more information about the ISO standard please contact ISO for more details.

#### 4.8.4 DocumentType

A code identifying the business context of a document.

Instance	Documentation
APM	Applied Promotions.
ARA	Authorization Request Approval.
CAR	Certificate of Analysis Response.
CBN	Product batch number of customer.
CCN	Customs clearance number.
CFA	Failure Analysis - Request document that will accompany the product providing characteristics of the component failure.
CIN	Commercial Invoice.
CNM	Traditional credit note or memo.
COA	Certificate of Analysis.
CON	In a virtual sourcing relationship, a third party trading partner is supplying a part to a customer on behalf of another company that has taken the order for the customer. In this case a Customer Order Number is associated to the request for material that is sent to the virtual trading partners.
COS	Consumption Notice.
COT	Contract.
CRN	Unique consumption reference number identifying the product consumption issue i.e. one-to-one relationship with physical flow.
DEM	Traditional debit note or memo.
DEN	Delivery Note.
DIN	Discontinuation Notice.
DOR	Delivery Order.
DRN	Drawing Number.
DRR	Design Registration Request.
ECO	Engineering Change Order - The proprietary unique identification number that represents an engineering change order.
EDD	Export Declaration Document.
EIR	Engineering Information Request.
EOL	End of Life.
FUO	Sales order or transfer order fulfilling demand out of a facility (outbound shipment).
IDD	Import Declaration Document.
INV	Invoice.
LID	Location Identifier. Data for on-site work that have to be done on the machine (associated with preventive maintenance order).
MEN	Master Event Number.
MID	Machine Identifier. Data for on-site work that have to be done on the machine (associated with preventive maintenance order).
MON	Model Number.
NTS	Notes.
OCL	The unique identifier assigned by the OEM for a warranty claim.
OGA	Other governmental agency issued document.
OPO	The unique identifier assigned by the OEM for a part order.
OPR	The unique identifier assigned by the OEM for a part return.
PCN	Product/Process Change.
PFA	Failure Analysis - Request document that will accompany the product

	providing characteristics of the product failure.
PII	Refers to previously issued invoice.
PLS	Unique number that identifies packing form prior to shipment.
POI	Purchase Order IN.
PON	Production order number for material release.
POO	Purchase Order OUT.
PRC	Product Catalog.
PSI	Refers to previously issued self-billing invoice.
PUO	Purchase Order.
QUO	Quote.
REC	Document identifying the receipt of materials or products into a facility against a purchase order or transfer order (inbound shipment).
REN	Release Number.
REO	Purchase order or transfer order replenishing inventory into a facility (inbound shipment).
REQ	Requisition.
RMA	Returned Material Authorization.
RPO	Purchase order for materials or product returned to and reworked by a supplier.
RTA	Remittance Advice - Remittance details.
SAO	Sales Order.
SBC	Credit Memo used in self-billing scenario.
SBD	Debit Memo used in self-billing scenario.
SBI	Invoice in self billing scenario.
SBN	Product batch number of supplier.
SCA	Similar to contracts - Contains the quantity of an article that is to be ordered from a vendor and the price for article or service that is to be procured.
SEN	Serial Number.
SEO	A document that gives a repair provider the necessary authorization to repair or upgrade a product either at the customer site or at the repair provider's site.
SHD	Shipping Document.
SNC	Shipset Number on Code List.
SPC	The unique identifier assigned by the ASP for a warranty claim.
SPN	Spec Number.
SPO	The unique identifier assigned by the ASP for a part order.
SPR	The unique identifier assigned by the ASP for a part return.
SPW	The unique identifier assigned by the ASP to reference a work order.
SRI	A document that contains the shipping reference number which allows the product to be tracked within the outsourced logistic providers network.
SWT	Switch Authorization.
TCS	Terms and Conditions.
TRO	Order which results in materials or products being moved from one facility to another (outbound shipment and inbound shipment).
WAB	Waybill.
WAC	Denotes a warranty claim.
WOO	Work Order.

### 4.8.5 MimeTypeQualifier

The MIME type as defined by IANA.

Please refer to <http://www.iana.org/assignments/media-types/> for a list of types.

## 5. System Structure

### 5.1 BusinessProcessIdentifier

A Business Process Identifier to uniquely define the TPIR-PIP 'role' within a Business Scenario at a company or MNC level. The identifier **MUST** be composed of alphanumeric characters only and its length **MUST** be between one and twelve characters.

**Figure 5-1 BusinessProcessIdentifier**

Attribute	Type	Documentation
pattern		[0-9a-zA-Z]{1,12}

### 5.2 BusinessServiceInformation

The object allows the specification of the business service utilized within the partner company. This may or may not be the same as the information sent by the RNIF.

**Figure 5-2 BusinessServiceInformation**

Attribute	Type	Documentation
actionName	string	The name of Action. For RosettaNet usually any of Request/Confirm/Notify/Query/Response.
serviceName	string	The name of the Business Activity with the "Request/Confirm" part removed. E.g., for the Activity "Request Purchase Order"==> "Purchase Order".
processIdentifier	string	The name of the PIP e.g. Notify of Forecast Reply.
processReference[0..1]	string	The URN for the PIP that includes Cluster/Segment/Process pattern used to identify the interface process (such as PIP3A4)
processState[0..1]	string	The business process (or service) state of the sender of a document. When a service receives

		this document, the receiver may use the state as a precondition.
--	--	--

### 5.3 ContractInformation

A block of information used to correlate a contract in an executing choreography.

**Figure 5-3 ContractInformation**

Attribute	Type	Documentation
contractIdentifier[0..1]	string	Unique identification of a contract between the Sender and the Receiver
contractType[0..1]	string	The type of the contract: an attribute describing the type of the ContractIndentification. Valid values are URI, URN, ebXMLCPA, or other values defined by partners.

### 5.4 CorrelationInformation

A block of information used to correlate a requesting document to a responding document and to the contract in an executing choreography.

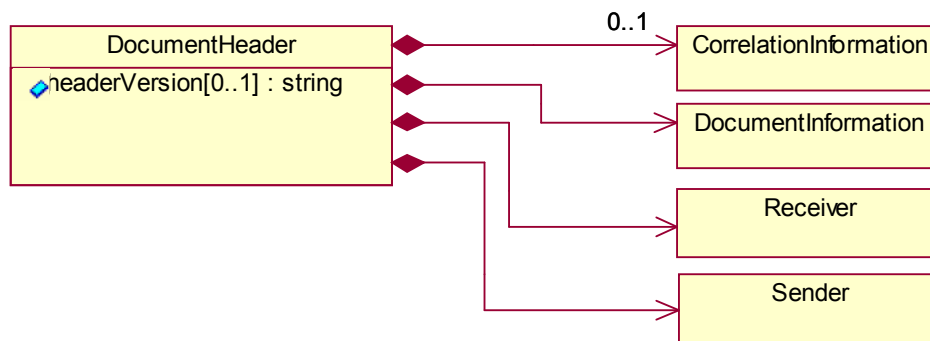

**Figure 5-4 CorrelationInformation**

Composition	Cardinality	Type	Documentation
ContractInformation	0..1	ContractInformation	A block of information used to correlate a contract in an executing choreography.
RequestingDocumentInformation	0..1	RequestingDocumentInformation	A block of information used to correlate a requesting document to a responding document in an executing choreography.

## 5.5 DocumentHeader

The object allows for the identification of the sender and receiver of the business document.

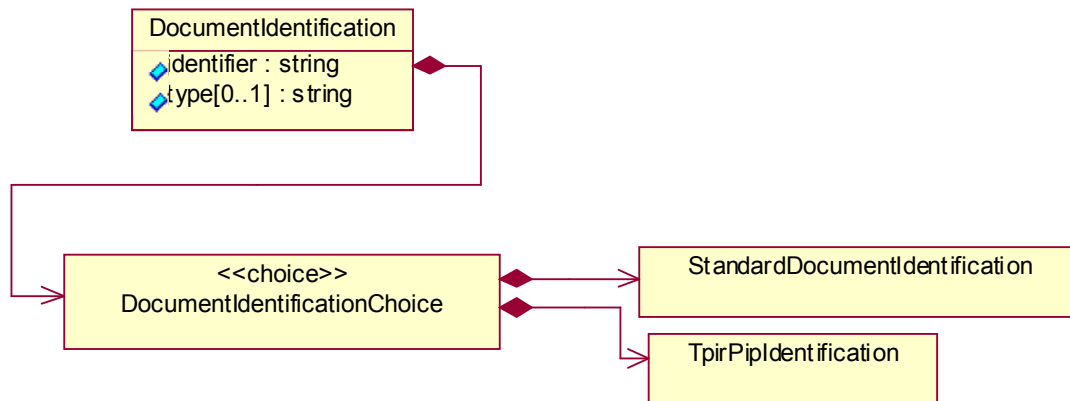

**Figure 5-5 DocumentHeader**

Attribute	Type	Documentation
headerVersion[0..1]	string	The UN/CEFACT version of the document header.

Composition	Cardinality	Type	Documentation
Sender	1	Sender	The object allows the identification of the initiating party of the business message.
CorrelationInformation	0..1	CorrelationInformation	A block of information used to correlate a requesting document to a responding document and to the contract in an executing choreography.
DocumentInformation	1	DocumentInformation	The object specifies information to identify the business document, a summary of attachments, and information about the business document security.
Receiver	1	Receiver	The object allows the identification of the receiving party of the business message.

## 5.6 DocumentIdentification

The object specifies all information necessary to identify the business document.

**Figure 5-6 DocumentIdentification**

Attribute	Type	Documentation
identifier	string	The unique identifier for the document being sent.
type[0..1]	string	Name of the Action Message

Composition	Cardinality	Type	Documentation
DocumentIdentificationChoice	1	DocumentIdentificationChoice	

## 5.7 DocumentIdentificationChoice

Composition	Cardinality	Type	Documentation
StandardDocumentIdentification	1	StandardDocumentIdentification	The object specifies additional information necessary to identify the standard business document.
TpirPipIdentification	1	TpirPipIdentification	The object specifies all information necessary to uniquely identify a TPIR-PIP within a Registry or trading partner repository.

## 5.8 DocumentInformation

The object specifies information to identify the business document, a summary of attachments, and information about the business document security.

**Figure 5-7 DocumentInformation**

Attribute	Type	Documentation
creation	dateTime	The creation date and time of the specified Business Document (i.e. the Purchase Order date).

Composition	Cardinality	Type	Documentation
DocumentIdentification	1	DocumentIdentification	The object specifies all information necessary to identify the business document.
DocumentSecurity	0..1	DocumentSecurity	The object provides additional granularity in specifying business document security (this is in addition to the specified PIP security).
DocumentManifest	0..1	DocumentManifest	The block provides a brief summary of attachments and Service Content.

## 5.9 DocumentManifest

The block provides a brief summary of attachments and Service Content.

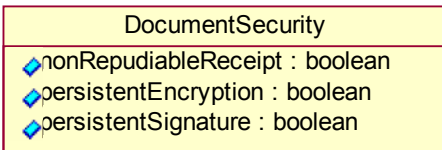

**Figure 5-8 DocumentManifest**

Attribute	Type	Documentation
multipleType[0..1]	boolean	Indicates whether the manifest contains documents of multiple types. True if yes, and False if no.
numberOfItems	positiveInteger	Total number of documents in the message. The physical count of the attachments in the payload plus the RosettaNet Business Message (for Service Content). The value of this field will be at least 1.

Composition	Cardinality	Type	Documentation
ManifestItem	1..n	ManifestItem	The object provides details about the specific attachment(s).

## 5.10 DocumentSecurity

The object provides additional granularity in specifying business document security (this is in addition to the specified PIP security).

**Figure 5-9 DocumentSecurity**

Attribute	Type	Documentation
nonRepudiableReceipt	boolean	The value "true" will indicate that a signed acknowledgement for the business document is necessary.
persistentEncryption	boolean	The value "true" will indicate that the Business Document (including the header) needs to be encrypted when stored or transported.
persistentSignature	boolean	The value "true" will indicate that a signature is required to be stored with the document while stored or transported.

## 5.11 ManifestItem

The object provides details about the specific attachment(s).

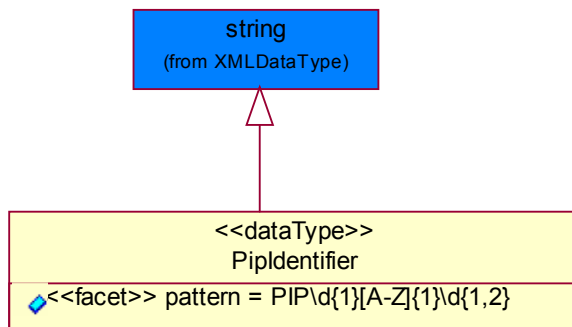

**Figure 5-10 ManifestItem**

Attribute	Type	Documentation
description[0..1]	string	A description of the attachment.
length[0..1]	positiveInteger	The size of the attachment in bytes (i.e. 1 000 000 bytes)
universalResourceIdentifier	string	The generic set of all names/addresses that are short strings that refer to resources.

Composition	Cardinality	Type	Documentation
mimeTypeQualifier	1	MimeTypeQualifier	The MIME type as defined by IANA. Please refer to <a href="http://www.iana.org/assignments/media-types/">http://www.iana.org/assignments/media-types/</a> for a list of types.
language	0..1	Language	For representation of Language name RosettaNet has adopted ISO 639-2; 1998. Refer to the following web page to get the latest version of the standard: <a href="http://www.loc.gov/standards/iso639-2/iso639jac.html">http://www.loc.gov/standards/iso639-2/iso639jac.html</a> . If you need more information about the ISO standard please contact ISO for more details.

## 5.12 PipIdentifier

PIP Identification.[ i.e. PIP3A4]

**Figure 5-11 PipIdentifier**

Attribute	Type	Documentation
pattern		PIP\d{1}[A-Z]{1}\d{1,2}

## 5.13 PipVersion

PIP version number (i.e. 02.02.00).

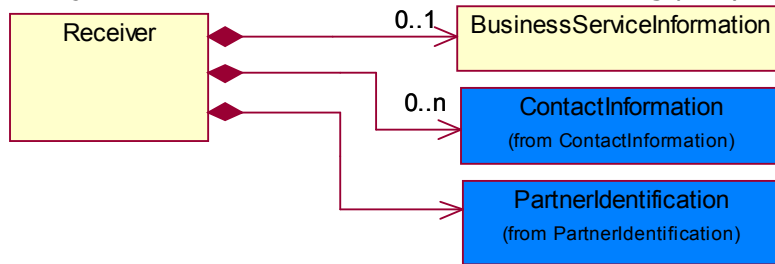

**Figure 5-12 PipVersion**

Attribute	Type	Documentation
pattern		\d{2}\.\d{2}\.\d{2}

## 5.14 Receiver

The object allows the identification of the receiving party of the business message.

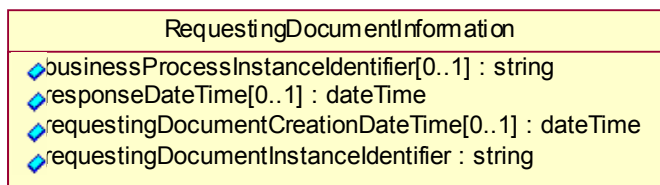

**Figure 5-13 Receiver**

Composition	Cardinality	Type	Documentation
BusinessServiceIn formation	0..1	BusinessService Information	The object allows the specification of the business service utilized within the partner company. This may or may not be the same as the information sent by the RNIF.
PartnerIdentificati on	1	PartnerIdentifica tion	The business document must allow for the identity of one or more parties to the transaction.
ContactInformatio n	0..n	ContactInformat ion	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.

## 5.15 RequestingDocumentInformation

A block of information used to correlate a requesting document to a responding document in an executing choreography.

**Figure 5-14 RequestingDocumentInformation**

Attribute	Type	Documentation
businessProcessInstanceIdentifier[0..1]	string	The identifier for the public business process instance being sent that both the sender and receiver can identify.
responseDateTime[0..1]	dateTime	The expected time to receive the response. This can not be greater than the PIP TimeToPerform.
requestingDocumentCreationDateTime[0..1]	dateTime	The date-time of the requesting business document.
requestingDocumentInstanceIdentifier	string	The Business Document identification number that identifies the requesting Business Document.

## 5.16 Sender

The object allows the identification of the initiating party of the business message.

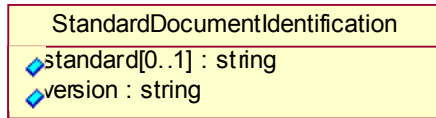

**Figure 5-15 Sender**

Composition	Cardinality	Type	Documentation
PartnerIdentification	1	PartnerIdentification	The business document must allow for the identity of one or more parties to the transaction.
BusinessServiceInformation	0..1	BusinessServiceInformation	The object allows the specification of the business service utilized within the partner company. This may or may not be the same as the information sent by the RNIF.
ContactInformation	0..n	ContactInformation	The business document must allow for the identification of the name of the department, service or individual to be contacted regarding the context of the business document.

## 5.17 StandardDocumentIdentification

The object specifies additional information necessary to identify the standard business document.

**Figure 5-16 StandardDocumentIdentification**

Attribute	Type	Documentation
standard[0..1]	string	Identifies the standard used to submit the business document. (e.g. RosettaNet).
version	string	PIP3A4v01.00

## 5.18 TpirPipIdentification

The object specifies all information necessary to uniquely identify a TPIR-PIP within a Registry or trading partner repository.

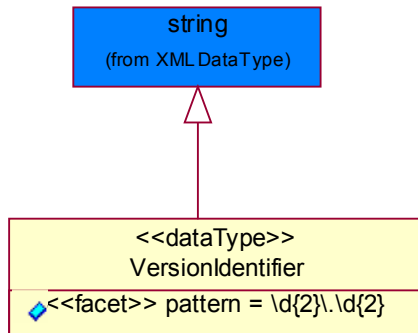

**Figure 5-17 TpirPipIdentification**

Attribute	Type	Documentation
partnerId	DUNSPlus4	The Trading Partner Identification of MNC that is creating this TPIR PIP.
pipIdentifier	PipIdentifier	A TPIR PIP Identification [i.e., 3A4 ).
pipVersion	PipVersion	A TPIR PIP version number (i.e., 02.02.00)
tpirPipVersion	VersionIdentifier	A TPIR-PIP Version Number (i.e., major and minor version number as XX.XX).
tpirBusinessProcessIdentifier[0..1]	BusinessProcessIdentifier	A Business Process Identifier to uniquely define the TPIR-PIP 'role' within a Business Scenario at a company or MNC level. The identifier MUST be composed of alphanumeric characters only and its length MUST be between one and twelve characters.
uri[0..1]	anyURI	Describes the destination uri for the TPIR form.

Composition	Cardinality	Type	Documentation
fileType	0..1	TPIRFileType	Describes the file type of the TPIR form (PDF, XDP or XML).

## 5.19 VersionIdentifier

Version Number (i.e., major and minor version number as XX.XX).

**Figure 5-18 VersionIdentifier**

Attribute	Type	Documentation
pattern		\d{2}\.\d{2}

## 5.20 CodeList

### 5.20.1 TPIRFileType

A code identifying the file type of TPIR form.

Name	Documentation
PDF	Portable Document Format.
XDP	XML Data Package.
XML	eXtensible Markup Language.

## 6. XML Data Type

### 6.1 anyURI

Represents a URI as defined by RFC 2396. An anyURI value can be absolute or relative, and may have an optional fragment identifier. **boolean**

Represents Boolean values, which are either "true" or "false". **date**

For the represents a calendar date.

The pattern for a date is CCYY-MM-DD where CC represents the century, YY the year, MM the month, and DD the day, with an optional time zone indicator as allowed

for dateTime. **dateTime**

Represents a specific instance of time.

The pattern for dateTime is CCYY-MM-DDThh:mm:ss where CC represents the century, YY the year, MM the month, and DD the day, preceded by an optional leading negative (-) character to indicate a negative number. If the negative character is omitted, positive (+) is assumed. The T is the date/time separator and hh, mm, and ss represent hour, minute, and second respectively. Additional digits can be used to increase the precision of fractional seconds if desired. For example, the format ss.ss... with any number of digits after the decimal point is supported. The fractional seconds part is optional.

This representation may be immediately followed by a "Z" to indicate Coordinated Universal Time (UTC) or to indicate the time zone. For example, the difference between the local time and Coordinated Universal Time, immediately followed by a sign, + or -, followed by the difference from UTC represented as hh:mm (minutes is required). If the time zone is included, both hours and minutes must be present. **float**

Represents single-precision 32-bit floating-point numbers. **positiveInteger**

Represents an integer that is greater than zero. This data type is derived from nonNegativeInteger. **string**

Represents character string.
